

# You Said: Community Benefit

As part of the consultation on Lentons Lane Solar Farm, we asked for ideas on how the local community could benefit from our proposals. You shared lots of ideas with us which we grouped into five key themes:

# We will: Community Benefit

Should Lentons Lane Solar Farm receive planning consent, as the Applicant E.ON is committing to a Community Benefit Agreement. The Community Based Agreement will establish a package of benefits, including a Community Projects Fund alongside targeted energy-related support.

Together, these will deliver community-based projects and offer discounted energy or subsidised energy solutions, with the level and type of support reflecting proximity to the development.

We are still working on the details, but this would be in place before construction work starts on site.

## Community Projects Fund

For wider initiatives that deliver long-term social or environmental value across the community.

## Discounted Energy Fund

Energy savings offered.

## Neighbours Fund

Subsidised energy solutions offered.

*Wider community*

*Closest to the solar farm*
